### 3. Definitions

ECO-EXPORT provides you with the document "new sales agents" where you can define **your search criteria**.

**A sales partner** is defined as a company or individual (no. 40.4 in the document "new sales agents") that sells to as many as, but at least to one of your target groups (40.2) within your target region (30.1). You can be certain that these sales partners usually have been selling complementary products to "your" customers since many years. **Depending on your search criteria, we need to contact about 10 to 30 sales partners to generate one candidate for you.**

**A candidate** is a sales partner that ECO-EXPORT has previously contacted and that has expressed specific interest in your company's products.

**The presentation of a candidate** takes place each time ECO-EXPORT sends you the contact details and information of a candidate.

**Industry focus of ECO-EXPORT:** We successfully deliver experienced sales partners for complex, technical products or for sanitary applications to our clients.
